Application/Control Number: 09/378,398

Art Unit: 2613

- 1: Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-37, drawn to a camera system comprising a viewfinder, classified in class 348, subclass 39.
  - II. Claims 38-53 and 111-122, drawn to a method for converting an image stored in a buffer and a method for combining a first frame and a second frame, classified in class 382, subclass 162.
  - III. Claims 54-95, drawn to a camera system comprising combining circuitry and motion estimation circuitry, classified in class 348, subclass 36.
  - IV. Claims 96-110, drawn to a camera system with a memory and display control circuitry with magnification factor selection, classified in class 348, subclass 240.99
- 2. The inventions are distinct, each from the other because:

Inventions Groups I, II, III, and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are Groups I, II, III, and IV. Group I involves a camera comprising a viewfinder displaying the second field of view when the camera lens is in the second orientation and displaying at least a portion of the first field of view at least partially composited with the second field of view, with view control circuitry for selecting a portion of the panoramic image to display. Group II involves a method for converting an image stored in a buffer as a first

Application/Control Number: 09/378,398 Page 3

Art Unit: 2613

plurality of color values at a plurality of pixel locations in a first coordinate system, computing color values at pixel locations along an axis within the buffer, uing non-linear transformation and a method for combining a first frame and a second frame comprising determining horizontal and vertical offsets and brightness and contrast parameters for chromatically aligning the first and second frames. Group III involves a camera comprising combining circuitry for at least partially combining the first frame and the second frame into a panoramic image, with motion estimation circuitry for determining horizontal and vertical offsets for spatially aligning the first and second frames, and stitching circuitry replacing color values at multiple pixel locations within the first frame with values that are weighted averages of color values in the first frame and color values in the second frame. Group IV involves a camera comprising a memory for storing data for a panoramic image, with display control circuitry responsive to movements of the camera, wherein at least one display control button includes at least one navigation panning button for navigation through the panoramic image in at least one direction, and wherein the display control circuitry selects a magnification factor for the selected portion of the panoramic image, wherein the display displays the selected portion of the panoramic image at the selected magnification factor. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Application/Control Number: 09/378,398 Page 4

Art Unit: 2613

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II, III, and IV, restriction for examination purposes as

indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37

CFR 1.143).

5. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:

(703) 872-9314, (for formal communications intended for entry)

(for informal or draft communications, please label "PROPOSED" or "DRAFT")

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington. VA., Sixth Floor (Receptionist).

Art Unit: 2613

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard Lee whose telephone number is (703) 308-6612. The Examiner can normally be reached on Monday to Friday from 8:00 a.m. to 5:30 p.m, with alternate Fridays off.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group customer service whose telephone number is (703) 306-0377.
